☰ **WiiM**

What we're working on …

Welcome to the WiiM Roadmap. We'd like to give you visibility into some of the projects that we are working on. Our official release notes have the full list of completed features. If you would like to make a feature or product request, please do so in the Wishlist (https://faq-mini.wiimhome.com/support/discussions/forums/72000258981).

Latest released on 9/5

Performance Improvements:

- Gapless playback for Amazon Music Ultra HD on the WiiM Home App (removing the fade in/out between tracks)
- Bitrate display on WiiM app for TIDAL Connect

Bug Fixes:

- Taking 15-20 seconds to change song with TIDAL Connect in some rare cases
- Unable to resume the playback for the last song on Amazon Music playlist
- Random crash when calling HTTP API with WiiM Mini
- Spotify Preset doesn't work on certain use cases
- Other performance improvements

Updates to be released by 9/15

New Features:

- Support landscape mode on tablets (iOS)
- Support gapless playback of the DLNA and Amazon music casting
- Release WiiM Home App for PC and macOS
- Adjust the time to enter SPDIF IDLE manually
- Add the album and playlist of the local music and Amazon Music to play queue
- Support Multiroom of the TIDAL Master
- Add the Aux-in content as the Alarm source

Performance Improvements:

- TIDAL playback performance improvement on the WiiM Home App

- TuneIn Radio Streams with the dynamic track info

Updates to be released by 9/30

New Features:

- New music service: SoundCloud
- Add the Album and playlist to playing queue for TIDAL and Qobuz
- Add the separate EQ settings for the Aux-in, BT and WiFi sources into Audio Settings and Alarm setting
- Support new Deezer API
- TIDAL Master MQA (Beta)

Updates to be released by 10/15

New Features:

- Mono channel output
- New music service: Pandora (Public preview)
- Users can select streaming quality in the "Now Play" app UI
- Gapless playback of the other Alexa music source (except Amazon Music)

Future updates

New Features:

- Enhance play queue functions
- Favorites section - User's favorite tracks, playlist, stations, podcast, and recently played are listed in the favorites section of app
- Support SMB for music sharing
- Overriding Volume +/- with Next/Prev to control playback
- New music services such as SiriusXM, Radio Paradise, Nugs.net, etc.
- Play music from personal cloud storage (Dropbox, OneDrive, iCloud, etc.)
- Users can select streaming quality in the "Now Play" app UI
