Music Streaming & Download in Hi-Res

# Welcome to Qobuz

**Q**obuz is an online music service that offers both streaming subscriptions and pay-as-you-go downloads. Our primary goal is to answer the needs of curious and discerning music lovers across the globe. In addition to its unmatched expertise in sound quality, Qobuz offers exclusive editorial content independently curated by a team of musical experts, for every genre.

Qobuz streaming subscriptions offer the entire catalogue of over 40 million tracks in CD quality. With the largest

catalogue of Hi-Res albums available for streaming and downloading in various formats, Qobuz is currently the only music service in the world that has received the « Hi-Res Audio » certification from the prestigious Japan Audio Society. Through partnerships with over 50 renowned Hi-Fi brands, our services and high quality music are easy to access.

The latest CTA research about Hi-Res Audio published in 2016 shows that half of digital music consumers are interested in streaming or downloading

audio music files in High-Resolution. Based on this research, Qobuz is more determined than ever to offer exceptional sound quality to everyone. We have a genuine commitment to respect the timbres, dynamics and the message created by each artist and sound engineer.

We believe our brand's unique services will change the way people listen to music for years to come.
