

Imports

Choose your import quality
It will be used as default for your
next imports

Important

Hi-Res files are voluminous
and will quickly fill your
storage space.

For the best listening
experience :

- you will need a lightning
adapter to USB camera and
a compatible self-supplied
DAC. If you are directly
using the jack audio output,
it will limit to a quality close
to CD 16-bit / 44.1 kHz.

- to avoid micro-
interruptions it is
recommended to not
import at the same time.
