Company Introduction

Supported by Strong R&D Team

Shenzhen Suyuan Industrial can do great industrial and mechanical design for audio products. We generate and present ideas, and create mechanical drawings thanks to our strong R&D team of approximately 30 engineers, including seven electronic engineers, five assistant electronic engineers, three transducer engineers, five mechanical engineers, five quality engineers, two software engineers and three art designers. They are responsible for electronics, transducer, wooden cabinet, molding design and sample making, for the technical guide during production, and for the quality testing and control. Our engineering team reads English documents well to communicate with customers timely and efficiently.

Our sales forces have rich and vast experience in trading area and speak English fluently. So, we can handle all pre- and after-sales issues timely and efficiently to form perfect sales service systems.

Providing Well-found QC Systems

Well-founded QC systems in Dragon also has been realized, including professional QC team, and all kinds of reliability and performance tests, such as drop, aging, high/low temperature, salt spray, four corner, static compression tests and 100% products on-line test.

Dragon has enrolled those who are the most suitable for their jobs. All the staff work at the neat and tidy offices corporately and efficiently to achieve the goal that is through our unsurpassed professional services to provide high quality products to customers. We run regular training courses to acquaint staff with occupational norm and improve vocational skills. Besides, we have special recreation room to enrich leisure time of our staff.

Dragon has cooperated with many clients overseas for many years, and has obtained consistently high praise from our customers since it was set up, which is not solely because of holding strong teams, but also because it owns whole production system. We have our own transducer, electronics, wooden cabinet, molding factories and assembly lines. All these factories are well-equipped with advanced modern facilities including audio precision ATS2 and LMS, CLIO, and tip top anechoic chamber for projects R&D and test online. Dragon has the tip top anechoic chamber and listening room in Asia, which many Chinese companies don't have, this is one of our advantages.

Meeting ISO and RoHS Standards

Dragon has all kinds of engineering and testing instruments for R&D as well as for products online. So, all the key parts for audio products are made in house. Dragon can thus offer products with highest quality at competitive prices. In addition to good facilities, all our factories have been ISO 9001-certified and all products are RoHS-compliant. Upon request of customers, we always take care of safety certification application. Contact us.
